### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's arguments with respect to claims 1-25 have been considered but are moot in view of the new ground(s) of rejection.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 22, 23, and 25 are rejected under 35 U.S.C. 102(b) as being anticipated by Oler et al. (U. S. Patent No. 6, 031, 866).

Regarding claim 22, Oler et al. discloses a method of reducing distortion in a receiver (Fig. 4) by computing a set of DFE coefficients (column 8, lines 10-21); canceling post-cursor ISI caused by a preceding symbol using the DFE coefficients in a feedback filter (block 40); and canceling pre-cursor ISI caused by a trailing symbol using a forward filter (see block 34, column 5, lines 59-64), wherein the forward filter and the feedback filter use the same DFE coefficients (column 8, lines 10-21).

Art Unit: 2611

Regarding claim 23, Oler et al. discloses a receiver (Fig. 4) comprising:

a first feedback canceler (block 40) for canceling postcursor-ISI using DFE coefficients (see column 8, lines 10-21); and a second canceller (block 34) for canceling postcursor-ISI (see column 5, lines 59-64) using the same set of DFE coefficients as that of the first canceler (see column 8, lines 10-21).

Regarding claim 25, Oler et al. discloses canceling post-cursor ISI and pre-cursor ISI in first and second cancelers (see rejection of claim 23) using the same set of coefficients (see column 8, lines 10-21).

#### ***Allowable Subject Matter***

4. Claim 24 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### ***Conclusion***

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to CURTIS B. ODOM whose telephone number is (571)272-3046. The examiner can normally be reached on Monday- Friday, 9-5:30.
